

Biarca Patrol enables customers to build and manage secure and compliant cloud environments without fear of security or regulatory disruption.

Biarca Patrol is designed to address the security and compliance needs of enterprise IT and InfoSec for their Google Cloud Platform (GCP) project infrastructure assets. Biarca Patrol creates visibility into complex IT challenges such as:

- Security misconfigurations.
- Compliance in a rapidly changing technology landscape.
- Migrating and replatforming to a secure cloud.

Biarca Patrol is an automated solution that:

- Deploys rapidly.
- Applies comprehensive security policies.
- Monitor compliance violations in real-time.

By allowing automated or user defined actions, Biarca Patrol monitors your cloud infrastructure resources, detects and remediates - unauthorized access, misuse and misconfiguration of your networks and resources.

Biarca Patrol Use Case Examples

POLICY-BASED MONITORING & CONTROL

- Choose compliance policy selection or manually set security and compliance policies.
- Intuitive dashboards for security and compliance.
- Maintained historical change log of assets and user activity.

REAL TIME DETECTION & REMEDIATION

- Supports continuous detection of changes and reports on the cause of events in the cloud.
- Continuous monitoring to ensure adherence to policies and alerts when violations occur.

INVENTORY OF ALL RESOURCES

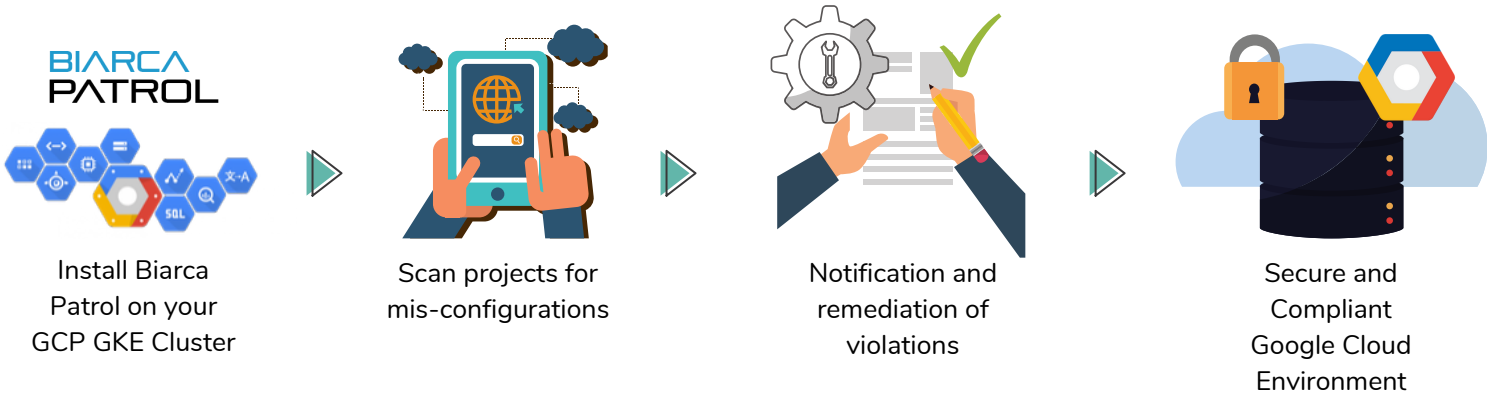

- Obtains complete visibility of cloud resources.
- Enables detailed reporting of finding and risk assessment process.
- Identifies violations and facilitates response.

COMPLIANCE ENFORCEMENT

- Enforces compliance to industry standards and regulations such as HIPAA.
- Identifies policy violations as they occur and deploys user/policy defined actions to restore compliance.

Biarca Patrol supports integration with Google Cloud Security Command Center (Cloud SCC), giving GCP customers access to Patrol scan logs. The following diagrams provide an insight to the technology, process, and procedures that we utilize to deliver solutions to our customers.

Biarca Patrol Work Flow

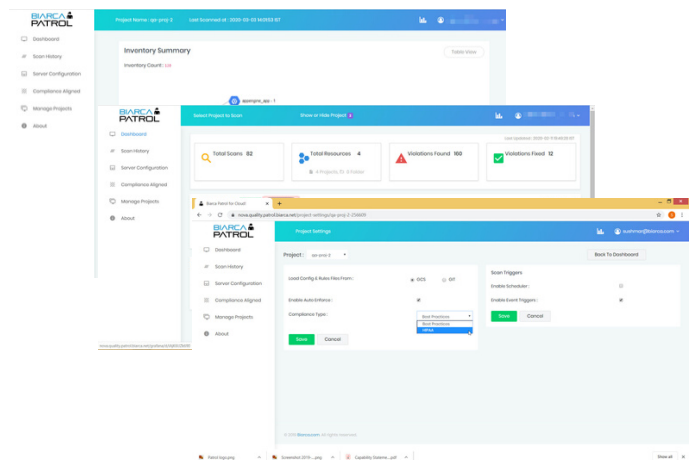

Biarca Patrol Architecture Features

- Rapid Deployment
- Robust Messaging
- Built for scale
- Scheduled and On-Demand Scans
- Microservices based
- Compliance Enforcement - Event based triggers
- Security & Compliance focused

Biarca Patrol User Experience

- Comprehensive Dashboards
- Real Time Updates
- Scan History
- Server Configuration
- Compliance Summary
- Managed Projects
